🛠️ Integration & Response Architecture

Clean RESTful Design: Our endpoints return optimized JSON for low-latency processing.

Key Metrics Included:

- **risk_level: Automated volatility calculation (High/Low).**
- **trend: Historical comparison (Bullish/Bearish).**
- **confidence_r2: Statistical validation of AI predictions.**

Sample Response: {"asset": "Copper", "price": 3.85, "risk": "LOW", "trend": "BULLISH"}

Optimized for Python, JavaScript, and Enterprise ERP integrations.
